About

Y.M I enjoy creating new things, using new tools and learning web programming. I have some success in HTML/SCSS/JS/Python which I will develop further and reach new heights for me! I do not want to scatter around other languages / frameworks. and I will improve what is, but where without React! Javascript / react - what I will do and enjoy, I will do well and quickly ... and most importantly, with high quality! Clean code, optimization, adaptability - that's what I offer! Just contact me #StayWithUkraine
